SELECTED ORIGINAL EVIDENCE

Facebook follower history — original 2019 report, p. 8.

Website redesign preview — original 2019 report, p. 12.

Prepared by Osman Osmani | Source material: original Berisha Group internal work report (2019).

The engagement at a glance

Building a coordinated online presence for a construction and real-estate developer.

Berisha Group required a more consistent digital presentation of its residential and commercial projects. Between 2018 and 2019, the engagement combined web development, social-channel activity, content production and digital asset management.

OBJECTIVES

- **Visibility** Make ongoing and completed projects easier to discover online.
- **Consistency** Maintain branded information, visuals and social channels.
- **Distribution** Publish project materials across relevant audiences and platforms.
- **Reusable assets** Organise a photography and video archive for future campaigns.

DELIVERABLES ACROSS FOUR WORKSTREAMS

Workstream	Delivery recorded in the historical report
Website	Company site development and a Bootstrap rebuild on 14 May 2019.
Social media	Facebook, Instagram, YouTube, Pinterest and Twitter activity.
Campaigns	Promotional graphics, social posting and approximately 28 paid promotions.
Content library	Project photography, video, creative designs and Google Drive archive.

Important context

This portfolio document describes historical deliverables. It is not a current audit of Berisha Group's channels and does not establish a measured sales impact. Numbers are drawn from the original internal work report prepared during the engagement.

Source: "Raport pune Berisha Group", 2019, pp. 3–6 and 11–13. Original English summary supplied alongside the source report.

Facebook growth and campaign execution

FIGURE 01 / FOLLOWER HISTORY

Original Facebook followers chart from the 2019 Berisha Group work report, p. 8. The chart is historical and self-reported.

CAMPAIGN MANAGEMENT

The source report records hundreds of Facebook posts and approximately 28 promotions, alongside audience interaction and responses to enquiries received through social channels.

These are counts of documented activity; the source does not independently establish leads, transactions or sales attributable to individual campaigns.

03 / WEBSITE & LOCAL DISCOVERABILITY

Website development and digital foundations

Updating the public company experience and maintaining accurate business information.

The first company website was developed in 2014. After an intervening WordPress implementation and a reported malware issue, a new website was developed using Bootstrap on 14 May 2019. This work also covered hosting/domain continuity and updates to location and contact information.

Figure 03 / Website presentation recorded in 2019, source p. 12.

Figure 04 / Historical Google Business presence, source p. 16.

DELIVERED ELEMENTS

- **Website** Frontend rebuild using Bootstrap and updated company presentation.
- **Local discovery** Business listing and project locations registered in Google Maps/Business.
- **Maintenance** Domain/hosting administration and correction of public contact details.

Source: Original report, pp. 5–6, 11–12 and 16–18. Screenshots document the earlier implementation; they do not represent the current live site.

Social channels and creative production

Making property projects visible through imagery, publishing and video.

CREATIVE AND PROJECT PHOTOGRAPHY

Figure 07 / Promotional creative examples, original p. 13.

PRODUCTION AND REUSE

The work report documents a substantial image library of built projects, construction progress and launches, supported by seasonal promotional designs and property offer graphics.

Pinterest: 167 pins. Twitter: 357 posts. These figures describe channel activity during the historical engagement rather than current presence.

Creative assets and event photographs supported repeated social publishing and video distribution.

What the documentation demonstrates

A concise source trail for professional review and responsible sharing.

VERIFIABLE WITHIN THE PROVIDED HISTORICAL MATERIAL

- **Growth record** A Facebook follower history with a reported change from 1,986 to 5,441.
- **Production record** Documented creation of social channels, posts, videos and promotional assets.
- **Technical delivery** A recorded Bootstrap website rebuild dated 14 May 2019.
- **Operational scope** Website management, updates to business listings and archived project imagery.

SOURCE MAP

Source pages	Supporting evidence
7–8, 20	Facebook profile, followers chart, promotions and Ads Manager snapshots.
9–10	Instagram, YouTube, Pinterest and Twitter activity.
11–12	Website history, 2019 rebuild and website screenshots.
13, 19	Promotional graphics and digital display/posting examples.
16–18	Google Business listing and location-registration screenshots.

INTERPRETATION AND ATTRIBUTION

This report is based on the original 21-page Albanian work report prepared in 2019 and the subsequent five-page English summary. The channel figures are historical self-reported snapshots, not independently audited results. Follower counts and campaign-activity figures are not evidence of revenue, conversions or commercial causality.

All inserted illustrations are extracted from the original Albanian report. They are reproduced as archival evidence of previous work, not as current screenshots. Any external publication of client-owned materials should be reviewed for sharing rights and privacy before use.

PORTFOLIO TAKEAWAY

The case demonstrates end-to-end digital responsibility: maintaining a company website, coordinating online channels, producing visual content, and documenting historical performance for management review.
